**HYBRID TANDEM CATALYTIC CONVERSION PROCESS
TOWARDS HIGHER OXYGENATE EFUELS**

E-TANDEM - Deliverable report

**D5.3. Intermediate “Results Ownership List” and strategy
for exploitation I**

**Funded by
the European Union**

Publishable summary

The aim of the *Results ownership list* is to determine the key exploitable results (KER) emerging from the work conducted in the project and to identify their major application niches/actors beyond the project. It additionally summarises the position of each KER owner/s towards the results and the technology/ies wherein each KER could be exploited. Those results which are included in this report may be partner specific or collective, i.e. acquired in partnership with other project partners. Thus, the ownership of the results is clearly identified in the current report. Specific types of exploitation considered span from patenting and IPR transfer, technology licencing, technology transfer or service provision to a third (industrial) party.
